

Conversion Table - Second Edition to First Edition

The numbering system for the standards was changed in the second edition to ensure the safety of children by clearly differentiating old standards from those in the new edition. In the second edition, the letter codes for each chapter used in the first edition, have been replaced by numbers such as 1. for Chapter 1; 2. for Chapter 2 and so on. To determine what new second edition standards replaced first edition standards, you may look up the new number in the left hand column. The previous number in the first edition will be located in the right hand column. An example: Center child:staff ratios is 1.002 in the second edition; it was ST 002 in the first edition.

Many standards were merged and thus there are fewer standards in the second edition. If a standard in the second edition is new to this edition and not a merged or replacement from the first edition, it will say NEW in the second column. See Appendix CC for the Conversion Table from First Edition numbers to Second Edition numbers.

Chapter 1 2nd Edition	Chapter 1 1st Edition	Chapter 1 2nd Edition	Chapter 1 1st Edition
